Experience

Flatiron Health
Data Insights Engineer

New York, NY

October 2021 – Present

- Developing deep learning models to extract clinically relevant data from unstructured real-world patient data.

Point72 Asset Management
Quantitative Researcher, NLP Research

New York, NY

July 2019 – September 2021

- Built internal financial news data products to support portfolio managers and analysts.
- Developed Bayesian and NLP models of internal data sets to generate trading signals, contributing to the fund portfolio.

Projects

PyMC Project
Open Source Core Developer

August 2018 – Present

- PyMC3 is a popular open-source Python framework for Bayesian modeling and inference.
- Maintaining littlemcmc (a standalone project of the PyMC3 samplers).

A Dataset of Cryptic Crossword Clues
Open Source Core Developer

September 2021 – Present

- Created a dataset of cryptic crossword clues, which is programmatically collected and extracted from blogs and digital archives.
- The dataset is the first and only such dataset that is freely available, openly accessible and larger than any in extant literature. It is a significant work of crossword archivism.

Education

The Cooper Union
BSE General Engineering, Summa Cum Laude

New York, NY

August 2015 – May 2019

- Awarded the Cooper Union Half Tuition Scholarship and Innovator Merit Scholarship.

Skills (Languages, Libraries and Technologies)

- *Daily:* Python, PyData ecosystem (Jupyter, NumPy, pandas, Matplotlib, etc.), PyTorch, AWS (EC2, S3), Git, Bash
- *Weekly:* SQL (Postgres, SQLite)
- *Monthly:* R, Docker, Jenkins
- *Previously:* PyMC3, Stan, Flask, Tornado, C++
